Adarsh Singh

Full Stack Developer | React, Node.js & TypeScript

adarshbambahadur@gmail.com | github.com/adarshbam | LinkedIn

Full-stack developer with experience building appointment-booking and payment workflows, developing technical course projects, and extending a cloud storage application with file integrations and access controls.

EXPERIENCE

ProCodrr | Technical Course Assistant

2023 - 2026

- Built JavaScript, React, TypeScript, and Node.js reference projects for Anurag Singh's YouTube and paid courses; collaborated with him to adapt implementations for teaching.
- Created interview questions and hands-on exercises aligned with course lessons for learners ranging from beginners to experienced developers.
- Contributed to the Node.js course storage project, then independently extended a personal implementation into Vault Storage.

Harigurus | Full Stack Developer

2022 - 2023 | 8 months

- Developed React and Node.js features for an appointment-booking platform connecting customers with purohits for religious ceremonies.
- Integrated Razorpay payments and Twilio SMS into the online appointment-booking workflow.

EasyGrad | Freelance Frontend Developer

2022

- Delivered three responsive web pages using HTML, CSS, and JavaScript for a freelance client engagement.

SELECTED PROJECTS

Vault Storage | GitHub

React, Node.js, Express, MongoDB, Redis, Backblaze B2, Cloudflare Workers

- Extended a course project with GitHub and Google Drive integrations, file transfers between connected services, and GitHub repository creation within the application.
- Implemented direct multipart uploads to Backblaze B2 using S3-compatible presigned URLs, plus HMAC-signed file delivery through a Cloudflare Worker.
- Added Redis-backed rate limiting and session caching, Argon2 password hashing, TOTP two-factor authentication, and role-based access checks.

CI/CD Pipeline Engine | GitHub

TypeScript, Node.js, workflow scheduling, process execution

- Built a workflow runner with dependency-based job scheduling, downstream failure handling, and bounded concurrency for independent jobs.
- Implemented idempotent trigger handling to prevent duplicate workflow runs; added per-job temporary workspaces, cleanup, and execution output and status tracking.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Application development: React, Node.js, Express, REST APIs, MongoDB, Redis

Tools & integrations: Git, GitHub, CLI, Razorpay, Twilio, GitHub API, Google Drive API
